Micro SD Card Metal C4 Panel Jack Screw

GT2MSD01P2

Micro SD Card Metal C4 Panel Jack Screw DIP

Specifications:

Contact: 9PIN

Current Rating: 0.5A

Temperature Range: -40° / +85°

IP Rating: IP 68

GTC Micro SD card connector is a type of memory card connector that can withstand water immersion and moisture. It is designed to withstand water immersion, protecting your precious memories, critical files, and important applications from rain, splashes, and even accidental dunks. Whether you're a photographer capturing stunning underwater shots, a hiker navigating with GPS in a sudden downpour, or a construction worker needing reliable data storage, this connector provides unwavering peace of mind.
